Dear County Recycling Coordinators:

I would like to introduce our company and what we may be able to offer your local municipalities in regard to yard waste disposal.

My name is Michael Hartman and I am President of H&H General Excavating Co. We have several different divisions in our company, one of them being a mulching operation. We are currently working with York County and some Adams County municipalities for yard waste disposal. We accept brush, limb, and tree trunk disposal as well as any wood product that is unpainted, untreated and free of metal. We also accept leaves of all kinds. These products may be brought to our facility during daylight hours, seven days a week, free of charge. H&H also offers onsite pick up of bulk material, **FREE OF CHARGE**. Call for details.

If you have any townships or boroughs that would have any interest in contacting us, please forward my information to them. We are attaching several pictures of our operation so you can see the handling of these products.

Thank you for your help in this matter. I look forward to hearing from you.
